

English

We will be reading and acting out lots of different fairy tales and having a go at writing our own!

As part of our maths learning this term we will be focusing on number and place value. We will also be working on adding and subtracting.

Science

In Science we will begin to study different materials and decide which material would be best for building a den for the three little pigs.

Computing

In computing we will be finding images for our fairy tales and word processing our non-chronological reports about Knights and Castles.

PSHE

It is important to start the year with class rules; we'll write a charter together and talk about why it's important.

RE

We will be learning all about how God created the world. We will also be thinking about people who care for us and help us to know God.

ART AND DESIGN

We will be exploring different mediums to create portraits of a Monarch. We will also design and build models of the dens for the three little pigs.

HISTORY

We will study the life of Queen Elizabeth I.

How you can help at home...

Each week children will be given a piece of English and Maths homework. Please help your child to complete this.

Read with your child and to your child every day!

Encourage your child to bring in anything from home that links to our topic - we are always interested!
